

# Make Your Resume Age-Proof in 6 Easy Steps

1. Ditch your old Earthlink or AOL email address and sign-up for Gmail.
2. Add a link to your LinkedIn public profile. If you don't have a LinkedIn profile stop reading this list and go create one now!
3. Take out "25 years of leadership experience" out of your resume's Career Summary/Objective section.
4. Only list your last 3 jobs (or 10 years).
5. Remove old geezer technology from your skills section (AS400, Cobol, NetWare, punchcards, etc.)
6. Remove the date you graduated collage and instead just list your school name, degree type, and major.
